Nancy

I am not quite sure where the difference in station location occurred. I am copying Chris Hayward to see if he has an answer. We submitted the station locations with the data set to IRIS which is where I believe the authors got the locations.

Brian

Hi Brian,

I am updating our DFW case study. Looking at the Janska and Eisner (Leading Edge Dec 2012) and the Frohlich et al (BSSA) I noticed that the SMU stations are not in the same location. Did you have a second deployment in 2009-2010? If so, do you have a publication on them, please?

Thanks,
Nancy
